Data Centres are the heartbeat of the digital world, **helping businesses run smoothly everyday.**

INTERACTIVE COMMUNICATION SOLUTIONS

FOR SECURING DATA CENTRES

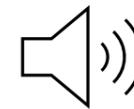

Communication united

With the convergence of intercoms, IP speakers, public address, voice alarm, and general alarm systems, Zenitel simplifies your business-critical communications for your data centres. We help you transition from siloed communication to a unified and cohesive communication approach, enabling you to act swiftly on what you see and hear.

Increased uptime with interactivity

Empower your security team by adding interactivity to your security solutions, through talk back, audio monitoring, and ambient listening functions, to enhance a fast response and enable clear communication with security violations throughout the data centre.

Keep everyone informed

Keep everyone informed using scheduled announcements and emergency alerts throughout the data center. With the ability to issue automated reminders of safety and security violations, you can now optimize the security resources and simplify daily operations.

Streamline Operations with Automated Workflow

Seamlessly connect with external security platforms, such as Video Management, Surveillance, Access Control and Building Management Systems, to automate processes with ease and enhance overall operational efficiency.

Helping data centres run smoothly with **Muti-layer security and communications solutions**

PUBLIC ADDRESS AND VOICE ALARM SYSTEM

Keep employees and visitors safe and secure

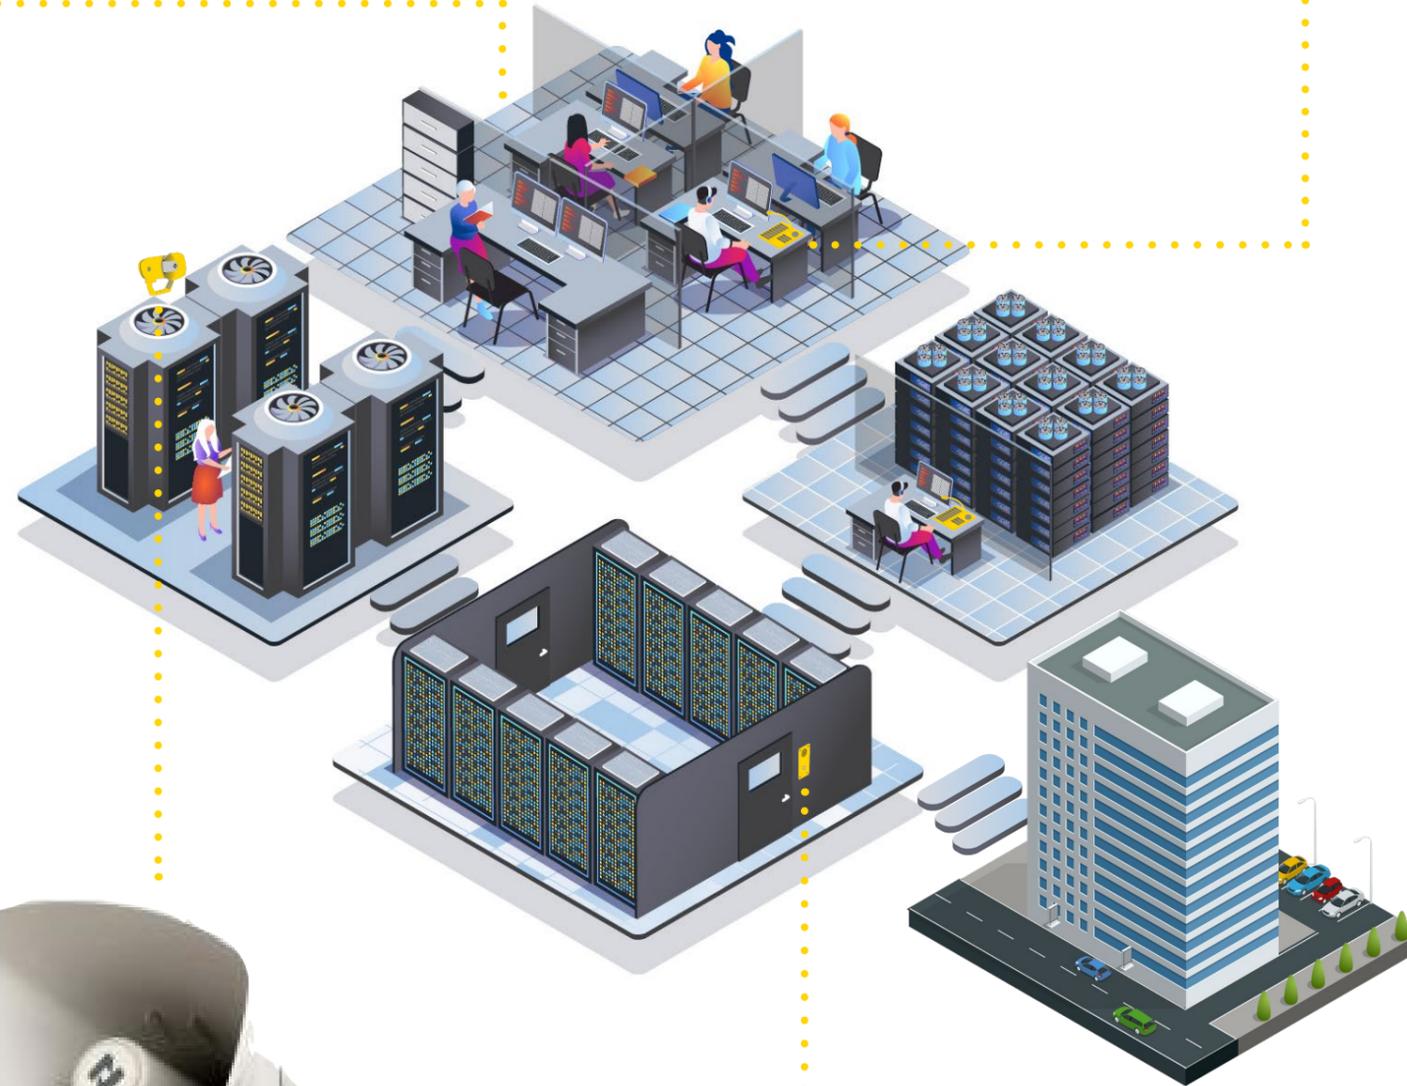

Delivering a truly maintenance-free solution, Zenitel's EN54-certified **Public Address and Voice Alarm** systems are ideal for emergency situations such as fire alarm throughout your data center. Products such as the low-profile Integra can be wall-mounted anywhere, offering operational public address, security, life safety, and paging announcements to help keep everyone informed.

IP SPEAKERS

Enhance awareness and protect your premises

IP speakers and public address systems are essential for mitigating security and safety challenges, especially in noisy environments. Empower your security team by adding interactivity through Talkback and Ambient Listening functions to your PA broadcasts and enable your team to act in real time and with clear communication, in all types of environments and situations.

UNIFIED COMMUNICATION PLATFORM

Streamline operations unified and integrated solution

Zenitel's ICXAlphaCom platform enables staff to manage all communication needs from single point. Answer intercom calls, manage door entry, emergency help points, and enable elevator and office communication.

Through open standards such as ONIVF and SIP, Zenitel's communication solutions are designed to complement your video, access control, and other security systems; enhancing situational awareness, reducing response time, and optimizing overall security posture.

VIDEO AND AUDIO INTERCOM

Limit access to your building

Positive visual and auditory identification of visitor through HD video and audio door entry intercoms. With the possibility of adding card readers from leading manufacturers such as HID and Elatec, you can now integrate audio, video, and access control into a single device. Streamline your visitor management and provide a positive experience for visitors.

Peace of mind with **proven and trusted communication solutions**

Zenitel has over 125 years of experience deploying thousands of successful communication solutions for facilities of all types around the world. We have a proven track record of delivering on our customer expectations, helping them to ensure the safety, security and wellbeing of their staff, visitors, facilities and assets.

Cybersecurity to keep systems safe

When developing products, Zenitel always meets stringent IT requirements for mission-critical systems. Our Data Centre solutions are not only highly reliable and maintainable, but also provide defence from cyber threats and attacks.
